TERRACOTTA
WALL FORMAT - REGULAR
SIDE BY SIDE MOUNTING

Anchor's Earth Light has been developed in both a wall and pendant format; the fitting is the same size in either format allowing it to be purposefully used across a range of environments both domestic and commercial.

EARTH LIGHT

PURE WHITE
PENDANT FORMAT

The Earth Light's geometric form is simple and architectural. Each fitting is thrown on a potter's wheel which gives every light a unique quality and a surface rich with the evidence of its hand made process. After an initial firing, the fittings are hand finished with glazes developed specifically for our lighting range.

ANCHOR CERAMICS
EARTH LIGHT

After an initial firing, each fitting is hand finished with glazes we have developed specifically for our lighting range. A final firing to 1,280 degrees Celsius, matures the glaze and finalises the piece. The Potter Light range is currently produced in a range of eight earthy glaze finishes.

All Anchor light fittings are made by hand on a potter's wheel. Minor fluctuation in size, shape and glaze finish is normal and an inherent characteristic of a handmade object. These subtle shifts from fitting to fitting give each object we make a unique quality and a surface rich with the evidence of its handmade origins.

EARTH LIGHT

New to the Earth Light range for 2018 is an additional size offering of the wall format fitting. The fitting is available in two sizes; the original regular size and a large size which builds on the same strong architectural form of its smaller counterpart.

Both the original regular size and large size Earth Wall Lights are produced in six glaze finishes we have developed specifically for the Earth Light range. The mounting bracket, lamp holder and other technical requirements are the same for both sizes of wall light allowing for an easy interplay between the regular and large sizes.
